

Case Study

Premier Waste

Award-winning waste disposal experts

Success brought its own problems for Premier Waste Services of Hyde, Greater Manchester. Continuing expansion called for larger premises with the facilities to repair their own truck fleet and skips for hire. Co-owner Frank Ridley needed an off-grid heating solution that was not only cost-effective but was also clean enough to satisfy his company's exemplary environmental record. The firm has won bronze, silver and gold in the Considerate Constructors Awards, winning honours three years running since they first entered in 2013.

“AvantiGas came down and Area Sales Manager Robert Burton stayed in touch until the time came closer to installing the system. We went back to them – and the rest is history.”

The Challenge

Radical renovations were needed for the off-grid building destined to handle the servicing and repair of Premier Waste’s fleet of 20 skip-hire trucks. After choosing LPG as the cleanest, most cost-effective space heating solution, the location of the bulk storage tank was crucial to the safe flow of traffic.

What We Did

AvantiGas Area Sales Manager Robert Burton worked closely with the client and with industrial heating specialist Harry Taylor of Ashton Ltd as AvantiGas engineers located the one-tonne bulk tank effectively and discreetly, maintaining clear sight lines for vehicles while staying safely away from truck movements. This meant installing 30m of pipework from tank to building to power the blow heaters supplied by Harry Taylor’s, with destratification fans deployed in the ceiling to maximise heating efficiency and minimise fuel usage.

The Results

“Rob has accommodated the tank and the piping for us nicely, the installation is good – otherwise it would have occupied too much of the operating area,” said Frank Ridley. “It all went very smoothly, very professional. And there’s no need to phone in orders – it’s automatic, which we were impressed with. We don’t have to keep an eye on that.”

AvantiGas is proud to work with business owners like Frank and companies like Premier Waste Services and Harry Taylor’s.
