

Stay Warm This Winter With AvantiGas

At AvantiGas we're always looking for ways to help you save energy and money, whilst still keeping you warm and ready for the winter months.

So here's some top tips to get you winter ready...

Look after your boiler

Get it checked regularly by a Gas Safe Registered Engineer, and keep it in tip-top condition.

Keep an eye on your thermostat

Turn it down by just 1°C and you could knock up to 10% off your heating bills.

Change to low energy light bulbs

They use 80% less electricity than traditionals and last longer too.

Get resourceful with your radiators

Put silver foil behind your radiators to reflect heat back into room. Installing shelves above them will help do this too.

Shut out the draught

Check your doors and windows for draughts and fit draughtproof strips if you need to.

Switch off, don't standby

Turn off your appliances instead of leaving them on standby and save around £90 a year.

Choose energy efficient appliances

Look out for A-rate appliances or ones with the Energy Saving Trust Recommended label.

Keep the warmth in your walls

Reduce the amount of heat escaping from your home, by installing external or cavity wall insulation.

Need any other advice or support?

If there's anything else you need this winter, you're sure to find it either on our informative, easy-to-use website, or on the MyAvantiGas portal. Still need to register? Get started today at myavantigas.avantigas.com
